

Astik Dyestuff Pvt. Ltd.

Quality and HSE Policy

- Being a major manufacturer of a variety of Synthetic Organic dyes, **Astik Dyestuff Pvt. Ltd.** recognizes the vital role it must play in setting industry standards for workplace health & safety and environmental protection whilst delivering top quality products and services.
- To achieve this mission, Company has developed a management system employing ISO 9001, ISO 14001 and ISO 45001 standards. Through this system Company is able to maintain comprehensive risk assessment, from health and safety to environmental evaluation, while providing quality products and services surpassing its clients' high expectations.
- To meet the management system requirements, we have set our objectives and resources to be committed to the following:
 - Establish and follow well defined processes, integrating flexibility and responsiveness without compromising on quality aspects.
 - We also emphasize the importance of making our operations sustainably efficient, resulting in cost effectiveness benefitting our stakeholders
 - Integrating QHSE considerations into our business plans and decision-making processes with a focus on reducing our carbon footprint.
 - Utilizing standard process safety and management techniques such as safety audits, analysis, and operability studies while keeping a record to minimize QHSE issues associated with our operations and preventing their reoccurrence.
 - Effectively communicating and Promoting QHSE responsibility among our employees and business partners of all levels via incentivizing QHSE responsible attitude and imposing mandatory training pre-requisites.
 - Periodically reviewing our policy, objectives, targets and measuring our QHSE performance for continual improvement
 - Complying with applicable Environmental, Health and Safety as well as applicable statutory and regulatory requirement.
